Ms. Sakshi Agrawal honored with Naika Award 2022

We will never have this day again so make it count.

We are glad to share that our Executive Director, The SAGE Group Ms. Sakshi Agrawal, continuously, she has been delivering her selfless services to educational institution thus she has been felicitated by the leading media house Nai Duniya, Bhopal (Nai Duniya is the flagship brand of the Sahara Group in its Hindi Print Media. The newspaper has a wide reach right from the Capital City, New Delhi to Bihar through Uttaranchal, Uttar Pradesh, Jharkhand, and Madhya Pradesh covering multiple states simultaneously through more than 7 editions.) in their one of the National Events and awarded with Naaika Award 2022 for her Exemplory Contribution in Education Sector and Corporate Social Responsibility by Mr. Narottam Mishra, Cabinet Minister, Madhya Pradesh Government as he was the esteemed chief guest in the program. She is bold enough to create new plans, rules, and organization plans. She creates a modern twist to traditional ways of running this university by asking questions and recognizing the talent of other people. Our successful Executive Director is willing to adapt to changes and learn new ways to thrive amidst the changes. A good example is the use of new technology. She made us learn to be technologically competent and not dependent upon our male counterparts or act in stereotypical ways. She is strong-minded that doesn't mean she is rude, conceited, or destructive. Her virtues display confidence. She is empowered, possesses a healthy self-image, and takes responsibility for her actions in life. The entrepreneurial spirit, by its very nature, requires to consider possibilities that most aren't brave enough to. Her charity and compassionate nature allow us to reach beyond our cookie-cutter lives and make a difference in the lives of others. By reaching out to others, we grow as individuals. A woman with a compassionate heart has great influence. We should be thankful enough to her for being so nice and having an understanding nature with us.

"From the desk of Pro Chancellor"

Fuelling consistently the next generation with passion and devotion. Dr. Prashant Jain; is " A profound leader " who gratifies an institution with his simplicity and calmness. He speculates that: Calmness is the only cradle of power. Also, simplicity is the power of human beings. Because it's the solution through which one can keep their mind relaxed and clear. With his clear strategies for life, his commitment to Sage University Indore is admirable. He visualizes the growth of students not just through their grades but by their overall personality. Focusing on the carrier is primary, but preparing students to face the upcoming modern world with advanced technology is the next level thing. Honourable Parshant Sir aims to work upon that basics area where we can raise today's youth as entrepreneurs, distinguished scientists, great engineers, and talented professionals. At the outset of the new academic session, I expect all my students to think beyond limits by keeping the target on their admired goals, and also by striving hard to accomplish their work by transcending mediocrity and procrastination and being the best. He rationally approves of the fact that with practical things and actions, rather than with abstract theories. He always seeks High levels of employee satisfaction in his organization related to work commitment and engagement in the educational organization. This results in superior progressive performance, which in turn results in increased productivity, employee retention, and overall improvement in the work atmosphere. We, the Sage University and entire Sage Verticals wish him lots of best wishes with high doses of happy moments and joyous contribution in every sector even from the bottom of our hearts we all are thankful to him for showering his abundant blessings and support to us in directly or indirectly manner. Mentoring is a critical component of career development and success for clinical translational science research faculty. Yet few programs train faculty in mentoring skills. We describe outcomes from the first two faculty cohorts who completed a Mentor Development Program (MDP) at UCSF. Eligibility includes having dedicated research time, expertise in a scientific area and a desire to be a lead research mentor. A post-MDP survey measured the program's impact on enhancement of five key mentoring skills, change in the Mentors-in-Training (MIT) self-rated importance of being a mentor to their career satisfaction, and overall confidence in their mentoring skills. Since 2007, 29 MITs participated in and 26 completed the MDP. Only 15% of the MITs reported any previous mentor training. Overall, 96% of MITs felt that participation in the MDP helped them to become better mentors. A majority reported a significant increase in confidence in mentoring skills and most reported an increased understanding of important mentoring issues at UCSF. MITs reported increased confidence in overall and specific mentoring skills after completion of the MDP. The MDP can serve as a model for other institutions to develop the next generation of clinical-translational research mentors.

"Budget is the strongest blueprint of a Nation's Economy"

*Budget is the strongest blueprint of a nation's economy. *A budget is a tool that helps a nation to foresee its future possibilities. It is a document prepared by the government and/or other political entity presenting its anticipated tax revenues (Inheritance tax, income tax, corporation tax, import taxes) and proposed spending/expenditure (Healthcare, Education, Defense, Roads, State Benefit, many more) for the coming financial year. Our patron, hon'ble chancellor Er. Sanjeev Agrawal acknowledged that the new budget will enhance the production efforts and pave positive steps towards the development of our nation. He also emphasized that the permission granted by the government for the construction of affordable housing is an appreciable act. He further added that it will also help in building up a strong base. He said that the government of India has sent an announcement of Ease of Doing Business 2.0 in the Real State Sector will speed up the progressive efforts in our country. Speed and transparency in this sector will reduce the overall cost which will later give benefit to the consumers. His way of viewing and keeping the major or impactful points in front of people is completely distinctive and profound.

"No one who does good work will ever come to a bad end, either here or in the world to come". Bhagwad Geeta is not content with providing a lofty philosophical understanding, it also describes clear-cut techniques for implementing its spiritual precepts for everyday life. Staying consistent is one of the most important jobs of a Chair. You must stay consistent with the rules, lack Bias, respect, etc. You have to be the rock from which delegates anchor their debate. Therefore, the delegates need to consistently understand what is happening and for that, you need to use terms they understand, consistently! Model United Nations is an educational activity that empowers students to solve global problems. In Model United Nations, students learn to lead. The MUN Institute is a world-class program for learning Model United Nations. Model United Nations (MUN) simulations are popular exercises for those interested in learning more about the UN. Hundreds of thousands of students worldwide participate every year in MUN at all educational levels – from primary school to university.
